

*** Troubleshooting for Beambender PC-Version ***

---- Released by Amiga Arena in 2020 ----

---- Troubleshooting by Miriam "Suicune" K. -----

Game doesn't start

The .reg file is may be missing. It can't start without it.

To get it, run the Setup from the CD, or write it yourself. It's easy, don't worry.

1. Open the Windows editor.
2. Copy follwing text into it:

Windows Registry Editor Version 5.00

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Classes\beambender]
```

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Classes\beambender\Setup]
```

```
@="setupok"
```

3. Save the file as filename.reg at your desired location. If you accidentally saved it as filename.txt, just rename it to filename.reg

4. Run the .reg and ignore Windows warning about it.

To edit the file, right click it and click Edit.

CTL3D32.DLL not correctly installed

Ignore this.

CD Missing

Press Yes. It wants the physical CD for the soundtrack.

Game works without it, you just don't have any soundtrack.

Direct X Error

Grab Direct X off microsoft.com and install it.

Game doesn't start

The .reg file is may be missing. It can't start without it.

Fullscreen only?

Yeah, it's not made for windowed mode at all.

It needs a program like DxWnd to run in windowed mode.
